DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Change Title To: --Liquid Crystal Display with Superposed Contact Holes and Method of Manufacturing the Same--

Allowable Subject Matter

1. Claim 4 allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or disclose in light of the specifications, a method of manufacturing an in-plan switching liquid crystal display having thin film transistors on a substrate, scan lines and signal lines connected to the thin film transistors and longitudinally and latitudinally crossing each other, and common wiring formed by the same layer as the scan lines and generating electric fields substantially parallel to the substrate between a common electrode connected to the common wiring and covering the signal lines partially via an interlayer insulating film formed on the thin film transistors, and pixel electrodes connected to the thin film transistors, wherein the third contact holes are formed inside the first contact holes while the fourth contact holes are formed inside the second contact holes.

Matsuyama et al. (US 2001/0006408 A1) and Tomioka et al. (US 6,958,799 B2) disclose a hole etched in a second inorganic insulating layer, but does not disclose that it is inside a hole etched in a first inorganic insulating layer. The hole is etched in a color filter layer inside. There would be no sufficient motivation to modify Choo (US 6,642,979 B2) in view of the Tomioka reference or the Matsuyama reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard H. Kim whose telephone number is (571)272-2294. The examiner can normally be reached on 9:00-6:30 M-F.
